Focal Lens Position:	Second Focal Plane
Lens Coating: Coated, Low Light Enhancement	Fully Multi-Coated, Full Wide Band, Waterproof
Reticle:	No Reticle
Material:	6061-T6 Aircraft Grade Aluminum
Weight:	7.9oz/224g
Length:	13.12"/333mm
Eye Relief:	89mm3.5"
Exit Pupil:	28mm
Turret Type:	Capped

Explanation of Minute of Angle (MOA)

MOA unit of arc measurements are based on degrees and minutes. There are 360 degrees in a circle and 60 minutes in a degree for a total of 21,600 minutes (MOA) in a circle. A minute of angle will subtend 1.05 inches at a distance of 100 yards.

Fast Focus Eyepiece

The Riton fast focus eyepiece is designed to quickly and easily adjust the focus on the rifle-scope's reticle.

TO ADJUST THE RETICLE FOCUS:

1. Look through the scope on max magnification at a blank white wall or white paper
2. Turn the eyepiece in or out until the reticle image is as crisp as possible.

Mechanical Zero

Your Riton riflescope is pre-set from the factory with the reticle in the center of the adjustment ranges.

TO FIND FACTORY ZERO:

1. Dial turret one direction until it will no longer rotate.
NOTE - Do not force the turret past it's stopping point.
2. Dial turret opposite direction counting how many times it turns.
3. Divide that total number of turns in half and dial to that number for your factory zero.
4. Complete this procedure for both windage and elevation dials to approximately center the adjustment range.

Mounting Your Magnifier

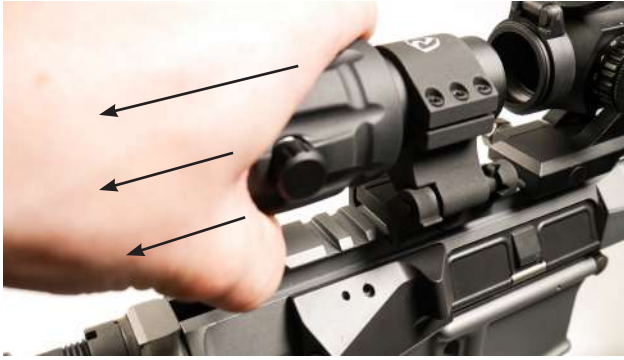

TO MOUNT YOUR RITON RED DOT:

1. Your Riton X1 Mag3 come with a mount and can be adjusted for right and left handed shooters.
2. Place your Mag3 behind hour red dot.
3. Loosen the base bolt. Then attach the lower base and make sure this is solidly seated in the base groove. To prevent recoil injury, position the Magnifier so that you have at least four inches of eye relief.
4. Be sure the base clamp is hooked around the outside of the rail/base. Press downward and forward toward the muzzle. Then, firmly tighten the base clamp.
5. You may have to move your red dot forward to allow for proper eye relief for Magnifier. Approximately 4"

Changing The Position

Grasp the magnifier firmly and pull towards yourself and rotate outwards left or right depending how you have it set up.

Riton Warranty

As a part of the Riton Promise we believe in providing you with the best possible service, including the industry's best warranty. The quality of our products makes this the best warranty you'll likely never have to use; however, as hunters and outdoorsmen and women, we know that bad things sometimes happen to even the most cautious.

OUR WARRANTY IS SIMPLE:

- No proof of purchase or registration required for your Riton products.
- Lifetime warranty regardless of original purchaser.
- All warranty replacements will receive a brand-new product off the shelf. We will not ever replace the product with a repaired or refurbished product.
- Replacement product will be shipped within 48 hours of receiving and approving your return.
- Loss, theft and/or deliberately worn and damaged products are not covered. Warranty is VOID if damage results from unauthorized repair or alteration.
